

(MSS 266 PM) Support Fund for HIV/AIDS Patients and their Families

This project consisted of i) Support Fund for HIV/AIDS Patients and their Families and ii) Social Support Programme of HIV/AIDS Patients and their Families

Aim and Objective:

1. To provide immediate and temporary financial assistance to HIV/AIDS patients and their families in a direct and effective way
2. To organise health talks, sharing meetings and other social support activities to promote mutual support among HIV/AIDS patients and their families, as well as enhance the patient's adjustment to the disease and develop positive coping strategies

Project Design:

- i) Support Fund for HIV/AIDS Patients and their Families (the Fund)
 1. The Fund was administered by the Social Welfare Department (SWD) and the planning, implementation and evaluation of the Fund were based on the SWD's experience in administering other charitable/trust funds
 2. Each successful application would cover a period not exceeding three months
 3. The Fund covers 6 categories of assistance
 4. HIV/AIDS patients and their families in need could make direct applications for the Fund at the MSSUs at Kowloon Bay Integrated Treatment Centre, Queen Elizabeth Hospital and Princess Margaret Hospital
- ii) Social Support Programme of HIV/AIDS Patients and their Families
 1. 3 designated Medical Social Services Units (MSSUs) at Kowloon Bay Integrated Treatment Centre, Queen Elizabeth Hospital and Princess Margaret Hospital would organise health talks, sharing meetings and other social support activities to the HIV/AIDS patients and their families. Reimbursement would be granted to the three MSSUs for the expenses of the programme

Target Population:

HIV/AIDS patients or their families who are in need of immediate financial assistance or social support programmes

Main achievements:

1. From 1.8.2017 to 31.7.2020, a total of 15 applications were received and all of them were approved with a total amount of \$43,293 granted to patients as financial assistance. The average amount of grant was about \$2,886 per application. The first and second highest portions of the Fund were granted to provide temporary maintenance for patients to meet their basic needs and to assist patients to meet expenses on essential items respectively. These, together with the short average processing time from the application date to the date of Fund granted, i.e. 1.72 days, reflected that the Fund could meet the objectives of providing immediate and temporary financial assistance to resolve patients' temporary financial hardship in a timely manner.
2. From 1.8.2017 to 31.7.2020, 27 programmes including 3 sharing meetings, 5 health talks and 19 large-scale festive social activities were organised by MSWs for a total of 1 416 participants.
3. The average rating of the activities was above 5.56 out of a full score of 6. This indicated that the programmes could meet the said objectives.

Conclusions:

1. This project has provided HIV/ AIDS patients and their families immediate temporary financial assistance with simplified procedures and firm confidentiality.
2. The Fund had been used in an effective way to relieve the HIV/AIDS patients with genuine financial need in a timely manner.
3. The programmes organised achieved the objectives of promoting mutual support among HIV/AIDS patients and their families and enhancing their adjustment to the disease and developing positive coping strategies.
